

LET'S ADD A LITTLE SOMETHIN', SOMETHIN' TO YOUR BOLLARDS

CRASHCORE SIGNAGE

Why not kill two birds with one bollard? Add a sign to our CrashCore Bollard for compliance and complete protection. Easily add an accessible sign to transform CrashCore into a crash-tested, ADA compliant sign.

Compliance

With a simple addition of an ADA sign to your bollard, you can stay compliant.

Peace of mind

Adding a crash-tested bollard to your signage gives you the comfort of knowing your people are protected.

Add Any Placard

We can match your bollards with any sign or style, so you don't compromise your design.

Did you know?

In most jurisdictions, ADA signs must be at least 60" above the ground. We place the bottom of our placards at 84", so signs do not become a hazard to pedestrians.

4" PLASTIC BOLLARD WITH SIGN POST

S10 Bollard
